

Front-End Web Design

Project 01 – Build a Web Site about a Country

Course Value: 40%

Due: End of day – December 05, 2018

Instructions:

- 1.) Select a country of the world
- 2.) Create a 3 or more page web site about the country selected in step 01
- 3.) The web site must contain the following:
 - a. A main navigation bar on every page which allows a user to navigate to any page on your web site from any other page
 - b. An HTML table
 - c. At least two images
 - d. An external link linking to a web site outside of your web site
 - e. Custom CSS styles located on an external stylesheet
 - f. Custom non-web-safe font (ie: a Google font or other custom font)
- 4.) The web site must be fully responsive and be useable between screen sizes of 320px wide to 1920px wide
- 5.) Use of “lorem ipsum” is permitted as placeholder text, however you can also use text copy on your country of choice from the Wikipedia web site for your chosen country as that text is licensed under a creative commons license and only requires attribution of the source and a link back to the original article.
- 6.) Validate your HTML and CSS using the validators located at the following addresses:
 - a. HTML Validator: <https://validator.w3.org/>
 - b. CSS Validator: <https://jigsaw.w3.org/css-validator/>
- 7.) Zip up your project folder and upload it to the Project 01 dropbox on the BCIT Learning Hub for this course.

Marking Criteria:

- | | |
|--|-----------------|
| - All instructions followed | 10 marks |
| - Design and Usability of the web site | 15 marks |
| - Quality of the code | 15 marks |
| - Total | 40 marks |

Late Project Policy:

- 5% per day up to a maximum of 30%
